Good things
 come from
Sysco | **ECOLAB**

The next big thing
in warewashing

SIMPLY BRILLIANT

It's now easier than ever to
get exceptional results and
control costs.

The Mobile Solids Dispenser uses
the perfect amount of detergent
and sanitizer every time.

Kitchen staff use
3x to 5x
TOO MUCH*
liquid detergent

PERFORMANCE

Solid chemistry specifically formulated for manual
warewashing delivers sparkling results

CONTROL

Dispenses the proper amount of detergent and sanitizer
every time, eliminating waste

CONSISTENCY

Sanitizer dilutes to 150-400 ppm, and is in compliance for
Health Department inspections

*2013 Ecolab Customer Behavior Study

The diagram illustrates the internal components of a mobile water treatment unit. It features a large red rectangular tank in the center, surrounded by a blue structure. A silver faucet is at the top, and a handle is on the right. The unit is labeled 'Mobile' in large blue letters. The diagram includes five numbered callouts: 1 (top left), 2 (top right), 4 (middle right), and 5 (bottom center). The bottom center callout (5) is located near a red and white striped area, likely representing a filter or sediment trap. The right side of the unit has a red label with the text 'So Désinfectant' and 'Désinfectant'.

-
- An abstract graphic featuring a vibrant red liquid splash at the top, with numerous small bubbles and a larger, more complex splash on the left. Below the liquid, a network of pink circles of varying sizes is connected by thin lines, resembling a molecular or data network. The background is a light pink gradient.
