KEYSTONE™

A NEW STANDARD OF HYGIENE

Touch-Free Dispenser

▲ Consistent, accurate dispensing.

▲ Easy to access and load product.

▲ Meets ADA requirements for walkways and corridors.

▲ Designed for fewer battery change outs and lower costs.

▲ Foaming products for great coverage with less product.

Studies have found that hand sanitizer from a touch-free dispenser was used 33% more frequently than from a manual dispenser.†

† American Journal of Critical Care. 2005;14: 304-311.

The Touch-Free Dispenser

takes hand hygiene to new levels of convenience, versatility and performance. When you standardize with Keystone's new dispensing system, you get an attractive, consistent look throughout your facility, with a system that is easy to use and maintain. The touch-free system also reduces cross-contamination because dirty hands never come in contact with the dispenser.

PERSONALIZED SERVICE AND SUPPORT

Sysco and Ecolab support your program with an experienced sales and service team that is dedicated to providing customized solutions to your food safety and infection prevention needs.
