Food Safety Solutions

SAFE FOOD, EVERY TIME

Safe Food First

Labeling is critical for food safety, which is critical to protecting your brand. In some cases, food looks fine, but date-marking food appropriately with use-by dates is the only way to ensure that food is used within safe limits before bacteria or other pathogens have grown to dangerous levels. Food rotation labels play an integral role in ensuring the food you prepare is safe to serve and safe to eat.

62% of restaurants do not label their food properly*

*According to a 2004 FDA Model Food Code Study on labeling, more than 62% of restaurants were not labeling their food properly.

Beyond Safety

– Serve the Highest Quality Food

You not only want to serve food that is safe to eat, you want to serve the freshest food possible—because when it comes to taste, quality is important. Freshness, wholesomeness, taste, color, smell and appearance are all integral to the quality of food. Even when food smells bad, tastes sour, or turns strange colors, it may not make someone sick, but that lack of quality is usually what impacts customer satisfaction and repeat business. Food rotation labels help ensure you always serve the highest quality, freshest, and best tasting food possible.

MASKING TAPE IS FOR PAINTING.

KEYSTONE LABELS ARE FOR FOOD ROTATION

Some foodservice operators decide to use masking tape for their food rotation process instead of labels because they believe it is a less expensive solution.

The reality is that masking tape usage is difficult to control and often drives up actual costs due to excess tape wasted.

Masking tape also leaves sticky residue on pans that builds up over time. Adhesive buildup is a health code violation because bacteria can live in the residue.

The most comprehensive food safety program

Sysco and Ecolab work together to bring you a complete food safety program that helps secure your reputation.

FOOD ROTATION: Labels are available in multiple adhesives for every type of restaurant environment and can significantly reduce your food costs.

CROSS-CONTAMINATION PREVENTION: Color-coded food safety tools and dedicated ice handling products help prevent deadly cross-contamination.

TEMPERATURE CONTROL: The right thermometers can minimize the potential for time and temperature abuse throughout the flow of food.

SANITATION & CLEANING: Cleaning tools are available to compliment your chemical program.

EMPLOYEE SAFETY: Our employee safety products allow you to provide a safe working environment for your employees.

KEYSTONE SOLUTIONS: With a wide range of products, Keystone keeps your business clean from the floor up, leaving you with more time to focus on other details.

We cover all the major food safety categories with over 4,000 food safety products.

For more information, please contact your local Ecolab or Sysco Representative.

Why Food Rotation Labels?

Exceed minimum standards: meet and exceed the minimum labeling standards required by the FDA Food Code.

Improve efficiency: employees can quickly and easily identify which foods need to be used or discarded.

Increase accuracy: pre-printed labels help guide employees to write down all the critical information necessary for labeling foods according to code.

Reduce food waste: keep food quality high by rotating foods properly and serving them within the appropriate time frame before they expire or spoil.

Improve safety: foodborne illness risks can be significantly reduced by ensuring food is labeled and stored properly.

Stay in compliance: masking tape or inferior labels leave adhesive residue after being washed, which is a critical violation on your health inspection.

Masking Tape... A Sticky Situation

Some foodservice operators use masking tape for food rotation because they think it is a less expensive solution. The reality is that masking tape:

- Is difficult to control
- Often drives up actual costs
- May result in difficult-to-read, inconsistent labeling

Most significantly, the adhesive residue left on pans by masking tape increases the risks of a health code violation.

Masking Tape Adhesive Residue is a Health Code Violation

It's because of the cross-contamination risk that tape adhesive residue creates.

Sticky residue can harbor bacteria, and the cross-contamination risk occurs when adhesive residue on the outside surface of a pan contacts the clean inside surface of another pan when the pans are stacked.

This can result in a critical violation if observed by the health inspector.

Food Rotation 101

- Food rotation is an organizational process that ensures that the oldest products will be used first.
- Labeling of foods for rotation is required by FDA 2017 Food Code.
- Food rotation reduces spoilage/ decreases food cost waste and helps prevent foodborne illness outbreaks.

**THERE ARE 2 KEY THINGS
a food rotation label must do***

1. Clearly show the Use-By date

Food Rotation Best Practices

- The FDA mandates that all prepared and repackaged food not consumed within 24 hours must be labeled with an expiration date.
- Printed food rotation labels help you practice First-In, First-Out food rotation. This helps maintain quality and prevent food waste.
- Keystone and Sysco Food Rotation Labels provide the critical information necessary to identify and rotate foods.
- Superior materials and adhesives ensure that no residue is left behind, helping prevent critical cross-contamination violations.

**2. Leave no bacteria-harboring
adhesive behind**

*According to the FDA Food Code, 2017

Keystone and Sysco® Food Rotation Labels

Types of Adhesives

Available in the following adhesives, Sysco and Keystone Labels are suitable for any application you need.

DISSOLVABLE LABELS

break down completely in water of any temperature.

PLASTIC REMOVABLE LABELS

are made from a unique plastic that will not come off until you want it to, leaving no residue even after going through a dishmachine.

PAPER REMOVABLE LABELS

must be removed before washing or water contact.

PERMANENT PAPER LABELS

are labels that have permanent adhesive.

Keystone™

Universal Food Rotation Labels

The perfect choice for operators that want to use just one label for all their food rotation needs.

- Eliminates the need to have a label for each day of the week
- Allows staff to capture the critical information necessary for health code compliance
- Features large, easy-to-read fields that make food rotation simple
- A superior food labeling solution compared to masking tape

PROBLEM: Sticky residue from masking tape harbors bacteria. This can result in a food code violation.

PROBLEM: Masking tape makes controlling usage difficult. Employees use 6", 8", or sometimes 12" or more to "make a label".

PROBLEM: Masking tape can be illegible, inconsistent, and does not cue employees about FDA labeling guidelines.

SOLUTION: Keystone Universal Food Rotation Labels remove easily and completely, leaving no adhesive residue.

SOLUTION: Keystone Universal Food Rotation Labels are pre-cut, so customers get the optimum number of uses out of each roll, every time.

SOLUTION: Keystone Universal Food Rotation Labels enable associates to provide all prep information in a clear, consistent format.

What's Great About Keystone™ Universal Labels?

- With 7 day-of-the-week colors included, one roll can take the place of 7 rolls
- Reduce label ordering/inventory complexity with one label for all days of the week

PAN COVERS

Ovenable Pan Liners

Helps save time and money

- ▲ Operational expenses such as hot water, cleaning products and scouring pads
- ▲ Increases Food Yield: Food will not stick to the pan liner surface
- ▲ Makes Food Safer: Food cooked with pan liners never touch the pan, so the chance of surface contamination is significantly reduced
- ▲ Withstand temperatures from -100°F to 441°F

Deep Hotel (34" x 12" x 6")

5356064 **Box of 50**

Shallow Hotel Pan Liner (34" x 12" x 2 1/2")

6545784 **Box of 100**

6 & 7 Quart Crock Liner (9 1/2" Diameter)

9439530 **Box of 100**

Low Heat Serving/Transport Liner Bags

Put an end to pan scraping and securely store leftover food with sealable pan liners.

- ▲ Safe for microwave, boiling water or steam tables
- ▲ Twist-tie seal to store leftover foods
- ▲ Not recommended for use in dry heat situations: oven or dry, electric kettles

Foods with a high fat content may cause the plastic to melt at lower temperatures.

Ice-Pak Sheet

Keep foods below the temperature danger zone limit of 41°F during storage and transport. Freeze the sheet to keep pre-chilled foods cold without the mess of ice. Useful in instances where refrigerated storage is unavailable.

0806901

Ensure that your food preparation process is properly implemented with thermometers

Many of the Ecolab thermometers are manufactured with BioCote®, an antimicrobial additive which can reduce levels of microbes on surfaces up to 99.99%. BioCote® is certified by HACCP International, and offers an extra level of protection on our thermometers against microbes; it does not protect guests from exposure to food-borne bacteria. Use a probe wipe in between taking temperatures and ensure proper cleaning practices are followed to help keep your guests safe.

Any instrument that proves to be defective in material or workmanship within five years of original purchase will be repaired or replaced without charge upon receipt.*

*Infrared Thermometers carry a 1-Year Limited Warranty

#1

One of the leading causes of foodborne illness outbreaks is time and temperature holding violations. - cdc.gov

ECOLAB THERMOCOUPLE

Digital thermocouple thermometers have the fastest response times and the widest temperature ranges.

Thin Tip Folding Thermocouple

This ultra-fast, lightweight and durable thermometer will be an asset in any kitchen. -58° to 572°F/-50° to 300°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ 3-second response time
- ▲ Reduced 1.5mm tip
- ▲ Water resistant
- ▲ Backlit for an easy-to-read display

1261470

ECOLAB BIMETAL FOOD THERMOMETERS

Bimetal or dial thermometers are economical, durable and can be easily calibrated. They respond quickly and accurately to changes in temperature.

Pocket Dial Thermometer

0° to 220°F

FEATURES:

- ▲ Accuracy +/- 2°
- ▲ 1" face
- ▲ Calibration tool on the sheath

1261365

Oven Safe Meat Thermometer

130° to 220°F/54° to 88°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Oven safe
- ▲ Can be calibrated in the field
- ▲ Cooking temperature guide on face

1261371

ECOLAB DIGITAL THERMOMETERS

Within the food service industry, digital thermometers, or thermistors, are typically the most commonly used temperature measuring devices. They are fast, accurate and easy-to-use.

Advanced Pocket Digital Thermometer

Feature-rich yet easy-to-use, this thermometer is an excellent choice for any foodservice professional. -40° to 450°F/-40° to 230°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Reduced 1.5mm tip
- ▲ 6-second response time
- ▲ Maximum temperature recall
- ▲ Can be calibrated in the field
- ▲ Hold setting
- ▲ Water Resistant

1261433

The Food Code requires the use of thin-tip thermometers to measure the temperature of thin-cut or thin-sliced food like hamburger patties

Pocket Digital Thermometer

This simple and affordable thermometer is a great option for those looking to make the move from a bimetal to a digital thermometer. -50° to 392°F/-45° to 200°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Easy one-button operation
- ▲ On/off switch
- ▲ Water Resistant

1261419

Thin Tip Pocket Digital

The 1.5mm tip makes it easy to take the temperature of even the most delicate of foods. -40° to 450°F/-40° to 230°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Reduced 1.5mm tip
- ▲ 6-second response time
- ▲ Can be calibrated in the field
- ▲ Hold setting
- ▲ Water Resistant

1261423

ECOLAB PROBE WIPES

Thermometer Probe Wipes are a necessary component to any food safety program.

Ecolab Probe Wipes

Pop-up tube of 70 single- use wipes. Wipes are single use and safe to discard in the trash. 70% Isopropyl Alcohol.

1261348

Ecolab Probe Wipes

Box of 200 single use packets. 70% Isopropyl Alcohol.

1261357

ECOLAB TIMERS

Timers are essential tools for every kitchen to help mitigate the risk of time and temperature abuse.

Multi-Task Timer and Clock

FEATURES:

- ▲ 24-hour timer and clock
- ▲ Counts up or down
- ▲ Loud and long alarm
- ▲ Memory recall function
- ▲ 3-way mounting: stand/magnet/clip

1261738

Large Digit Timer

FEATURES:

- ▲ 100 minutes by seconds
- ▲ Counts up or down
- ▲ Loud and long alarm
- ▲ Memory recall function
- ▲ 3-way mounting: stand/magnet/clip

1261748

ECOLAB GRILL/OVEN THERMOMETERS

Grill Thermometers are designed to accurately measure the surface temperature of a grill, frying pan or griddle. Oven Thermometers verify that your equipment is maintaining the proper temperature.

Grill Surface Thermometer
100° to 800°F/40° to 425°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ High heat range
- ▲ Tall grips for safe removal
- ▲ Easy-to-read temperature guide
- ▲ Stainless steel housing

1261540

Oven Thermometer
150° to 550°F/70° to 280°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Easy-to-read dual scale
- ▲ Oven safe
- ▲ 2-way mounting: stand/hang
- ▲ Stainless steel housing

1261534

ECOLAB INFRARED THERMOMETERS

Use infrared thermometers to instantly read food and equipment surface temperatures. Non-contact operation helps eliminate the possibility of cross-contamination and damage to food.

They are ideal for:

- ▲ Confirming the temperature of deliveries that are temperature sensitive
- ▲ Finding the surface temperature of delicate foods without contact
- ▲ Monitoring the temperature of buffets and salad bars
- ▲ Checking the surface temperature of grills, ovens, woks and frying pans; and ensuring equipment is functioning properly

Ecolab Infrared Gun

Perfect for a multitude of foodservice applications.
-76° to 1022°F/-60° to 550°C

FEATURES:

- ▲ 1-second response time
- ▲ Distance to spot: 12:1
- ▲ Bright red laser pointer
- ▲ Backlit for an easy-to-read display

1261447

Infrared/Thermocouple Probe

Measures both surface and internal temperatures with a HACCP Pass/Fail Warning System. Infrared: -76° to 482°F/-55° to 250°C Thermocouple: -67° to 628°F/-55° to 330°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Distance to spot: 2.5:1
- ▲ Reduced 1.9mm tip
- ▲ White light target illumination

1261457

Mini Infrared Thermometer

Pocket-sized, convenient and affordable.
-67° to 428°F/-55° to 220°C

FEATURES:

- ▲ 1-second response time
- ▲ Distance to spot: 1:1
- ▲ Easy-to-read display
- ▲ Min/max memory

1261468

ECOLAB REFRIGERATOR/ FREEZER THERMOMETERS

Verify your equipment is maintaining the correct temperature and help ensure that food is being held at the proper temperature, essential for safe storage.

Large Refrigerator/Freezer Wall
-10° to 80°F

FEATURES:

- ▲ Large 12" diameter face
- ▲ Color-coded temperature zones
- ▲ Easy-to-read oversized dial
- ▲ Mounting: hang
- ▲ Relative humidity indicator

1261512

Refrigerator/Freezer
-40° to 80°F/-40° to 27°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Safe temperature zone indicators
- ▲ Non-mercuric column
- ▲ 2-way mounting: stand/hang

1261496

Dial Refrigerator/Freezer
-20° to 80°F/-30° to 30°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Color-coded temperature zone indicators
- ▲ Easy-to-read bold numbers
- ▲ 2-way mounting: stand/hang

1261500

Refrigerator/Freezer Thermometer

-40° to 120°F/-40° to 50°C

FEATURES:

- ▲ Accuracy +/- 2°F
- ▲ Color-coded temperature zone indicators
- ▲ Non-mercuric column
- ▲ 2-way mounting: hang/suction cup

1261488

DISHWASHER TEMP LABELS

These labels help ensure your operation adheres to the FDA Food Code, which states that surfaces should reach a minimum of 160°F while being washed.

Sensor labels remove easily and leave no adhesive residue.

160°F
5180336

Pack of 24.

TO USE THESE SENSORS, APPLY THE LABEL TO A DRY SURFACE.

WASH THE ITEM IN THE DISHWASHER, AND CHECK THE SENSOR.

IF THE SENSOR TURNS BLACK, THE SURFACE HAS REACHED CORRECT TEMPERATURES.

IF THE SENSOR REMAINS WHITE, ADJUST YOUR DISHWASHER SETTINGS AND RE-TEST USING THE SAME SENSOR.

T-STICK TEMPERATURE SENSORS

T-Sticks are a revolutionary single-use, cardboard thermometer used to quickly check if meat, fish or poultry are thoroughly cooked and safe to eat. The tip of the T-Stick changes color to indicate when a safe temperature has been reached.

T-Stick Temperature Sensors

- ▲ Single-use, cardboard thermometer
- ▲ Check temperatures of meat, fish or poultry
- ▲ Safe temperature indicated by the tip changing from white to colored
- ▲ Can be used to monitor dish machine rinse water

140°F

Use for hot holding.

5025750 Box of 500

160°F

Use for commercial dishwashers and cooking meats.

5025772 Box of 150

160°F

Use for commercial dishwashers and cooking meats.

5025784 Box of 500

165°F

Use for Poultry.

4976546 Box of 500

T-STICKS HAVE ANOTHER FUNCTION. WHEN PLACED BETWEEN THE TINES OF A FORK AND LOADED IN A DISHWASHER, THEY CAN INDICATE IF YOUR MACHINE WATER IS REACHING THE DESIRED TEMPERATURE. THEY WILL TURN DARK IF THE PROPER TEMPERATURE IS ACHIEVED.

ECOLAB TEMPERATURE RECORDING STATION

Archive your temperature measurement and calibration records that support your HACCP program.

Ecolab Temperature Recording Station

Ecolab's Temperature Recording Station provides an easily recognizable location for archiving your temperature measurement and calibration records that support your HACCP program.

3164797

The station includes a binder with forms for:

- ▲ Cooking
- ▲ Holding
- ▲ Freezer/Cooler Temperature
- ▲ Cooling
- ▲ Dish Machine Rinse Temperature
- ▲ Thermometer Calibration

To order, contact your Sysco representative.

Blue DuraLoc Starter Kit

Starter Kit contains:

- ▲ 4 handles
- ▲ 4 tool holder hangers
- ▲ 2 Mop inserts
- ▲ 2 squeegee inserts
- ▲ Deck Brush
- ▲ Big Dipper
- ▲ Angle broom
- ▲ 3 Universal Insert Holders

Mop Bucket and Outdoor Sweep not included

7015154

Blue DuraLoc Dual Cavity Mop Bucket

Features two separate compartments, one for cleaning solution and one for dirty water, helping to eliminate contamination for a better clean. The rear Mop Wringer and Bucket are completely removable and can be emptied easily, helping eliminate strains and accidents for a safer cleanup.

- ▲ Durable down-press wringer with large opening
- ▲ Superior, heavy-duty construction

4398354

The DuraLoc Lobby Broom's replaceable head helps you maintain a clean facility without replacing the entire broom.

DuraLoc Dust Pan & Lobby Broom with Hanger

The DuraLoc Dust Pan & Lobby Broom features durable construction and a replaceable broom head. The ergonomic design provides comfort and efficiency. Unique storage clip allows storage during use. Fits in DuraLoc Tool Holder and Hangers. Includes a DuraLoc Single Hanger.

7041806

DuraLoc Lobby Broom Insert

The DuraLoc Lobby Broom Insert features easy replacement with single-button operation.

ECOLAB INTERLOCKING HANDLES

The threaded, interlocking connectors provide a sturdy connection that gives you the stability of a fixed handle and the convenience of interchangeability. An engineered center support increases the connection surface area, which allows for a more durable connection that resists wear, bending and breakage.

TRADITIONAL THREADED
CONNECTOR

MORE THREAD COVERAGE THAN THE TYPICAL MOP OR BROOM HANDLE CREATES A STRONGER CONNECTION.

INTERLOCKING THREAD
CONNECTION

ADVANCED FLOOR CLEANING TOOLS

Why is Kitchen Floor Cleaning Important for Employee Safety?

- ▲ Greasy kitchen floors are slippery
- ▲ Slippery floors are dangerous and can cause a slip-and-fall injury
- ▲ Industry reports suggest each slip-and-fall costs \$3,000 on average

This mop has been proven to improve floor traction significantly by absorbing nearly twice as much soiled liquid and also releasing more grease during each rinse. The yarn uses a unique blend of fibers that resist oil buildup, outlast cotton mop heads and reduce drying time by up to 50%.

| Grease-Release™ | Standard Mop |
|---|--|
|  |  |
| SUPERIOR GREASE RELEASE ACTION | |

Proven to reduce conditions for slip, trip & fall incidents when used as part of an everyday floor cleaning program

17 oz. Grease Release Mop

Grease Release mops absorb and release nearly twice the amount of liquids as conventional mops, which allows floor to dry faster and reduces labor costs. Looped and banded end.

- ▲ Twice as efficient as conventional mops
- ▲ Reduces conditions for potential slip-and-fall occurrences by improving floor traction
- ▲ Lasts two to three times longer than a standard mop when cared for properly*
- ▲ Minimal re-depositing of soiled liquids on floor surface

*Launder mop heads regularly in a laundry bag with detergents typically used for this purpose. Do not use bleach or tumble dry – air dry is recommended.

DUAL CAVITY MOP BUCKETS

Ecolab Dual Cavity Mop Bucket

- ▲ Plastic injection-molded divider
- ▲ Durable down press wringer with large opening
- ▲ Non-marking casters control floor shadowing while providing a firmer, stable base
- ▲ No removable pieces to misplace or break
- ▲ Large capacity for big jobs
- ▲ Heavy-duty construction

7793270 **Blue**
 7797788 **Green**
 7797776 **Red**
 7794726 **Yellow**

Dual Cavity Bucket separates the clean water from the dirty water. Molded divider keeps the cleaning solution separate from the soiled water, so that it is not reapplied onto the floor.

GRIDDLE CLEANING

The Ecolab Hi-Temp Tools now make cleaning hard-to-reach areas of kitchen equipment easier and safer. The long, 22.5" ergonomic handle with a nonslip hand-stop and grip ball helps keep the user at a safe distance from hot surfaces and liquids. The interchangeable multi-brush heads are easily removed for cleaning, replacement and handheld use as well. The tools are heat-resistant up to 350°F and are designed for use on fryers, griddles and other kitchen equipment.

Ecolab Hi-Temp Tool Starter Kit

Ecolab's Hi-Temp Tool Starter Kit contains what you need to be on your way to cleaning fryers and other kitchen equipment faster, easier and safer. Contents include items 1 - 5:

- ▲ One Ecolab Hi-Temp Handle
- ▲ One Ecolab Hi-Temp Detail Brush
- ▲ One Ecolab Hi-Temp Double-Sided Brush
- ▲ One Ecolab Hi-Temp Pad Holder
- ▲ One Box of Ecolab Hi-Temp Pads

1959453

1 Hi-Temp Pad Holder

- ▲ Flat surface makes cleaning easier, while the arched design maximizes tool contact on surfaces. Pad not included.

1961803

2 Hi-Temp Pads

- ▲ Box of 10 pads
- ▲ Fitted pad works to remove buildup and is easily removed for replacement
- ▲ Single pad can be used for multiple cleanings; rinse after each use

1961816

3 Ecolab Hi-Temp Handle

- ▲ Hi-Temp universal handle features a quick release mechanism for easy removal of tool heads and a hanging hook for convenient storage
- ▲ Ergonomic 22.5" handle designed with nonslip hand-stop and grip ball helps keep the user a safe distance from hot surfaces, liquids and mitigates accidents

1961549

4 Ecolab Hi-Temp Double-Sided Brush

- ▲ Wedge-shape brush head fits well in to corners, and bristles assist in cleaning crevices
- ▲ Top-mounted bristles, combined with the angled head, help access hard-to-reach areas

1961552

5 Ecolab Hi-Temp Detail Brush

- ▲ L-shaped, thin profile allows head to fit in between heating tubes and coils where soils accumulate
- ▲ Designed to reach tight areas in fryers (gas, electric, low volume oil (LOV) or traditional)

1961566

Ensure You Have The Right Tools

These products help protect hands from grease and burns while providing better cleaning leverage.

Ecolab Griddle Polishing Pad Holder

SNAP TO IT! With its ergonomic design, extended reach, and larger pad snapped securely in place, the Ecolab Grill Cleaning Pad Holder promotes grill cleanliness like never before. The grill Cleaning Pad Holder reaches the front, back, sides and beveled edges of 2-platen and 3-platen grills. Lightweight, durable, and with a heat tolerance up to 450°F/232°C, the Grill Cleaning Pad Holder was designed with safety and efficiency in mind.

0065280

Griddle Polishing Pads

Each 4" x 5" pad is good for 10 cleanings, rinse after each use.
